Career Objective

Find opportunities to create impactful solutions ,while implementing successful technological and managerial practices.

Highlight

I work in the Artificial Intelligence / Big Data/ IoT space And build human intelligence

My role involved working closely with medical professionals to create data driven self-sustained ecosystems

Work experience

Artificial Intelligence Engineer

July 2019 - Present

PION AI

A predictive medicare AI Company

- Developed deep learning paradigms in distributed learning architecture
- Co-created UI/UX for Monitoring and Analysis of real-time training
- Image analysis and exploration of retinopathic images
- Docker formulation and implementation
- Relational Database orchestration
- Medical big data analysis
- Predictive Healthcare
- Rapid Prototyping on Covid-19 severity symptomatic predictions
- Mongo Dbs Deployment on Cloud and Remote operations

Guided Project

May 2018 - June 2018

NVIDIA

- Designed a deep neural network to segment and classify vehicular objects for an autonomous automobile.

Education

Bachelor of Technology

2015 - 2019

Manipal Institute of Technology

Earned my Bachelor's in Instrumentation and Control Engineering

Skills

Python
Apt at scripting and experimenting

Machine Learning
Created multiple sklearn based AI systems for Image and Time series Datasets

Deep Neural Network
Worked on Tensorflow,PyTorch and Keras based Models to Classify and do predictive tasks

Data Analysis /EDA
Worked on presenting big data in meaningful ways

Feature Management
Lead a team to create and implement meaningful features.

Content Writing
Created formal Technical Articles

Digital Image Processing
Created well thought out image augmentations for medical imaging system

Instrumentaion
Have great acumen creating 8052 based control systems

Digital Marketing
Completed Multiple academic projects pertaining to the topic

Positions Held

Electronics Head , DronAid

Vice President , MIT Gaming

Languages Known

Python, Proficient in Hindi and Proficient in English

Volunteer Experience

Logistics Specialist Oct 2017 - Present

People For Animal Welfare

Conducted research to develop rehabilitation structures
